

Understanding Potential Hurdles To Using Better Site Design  
For Water Quality Protection  
*What's the Stall? ~and~ Assessing the Accessibility of Sidewalks and Pathways*  
December 10, 2003

**5. Sidewalks, Walkways, and ADA Requirements**

Very Useful: 4

Useful: 10

Not Useful: 0

Comments:

- Speaker should focus on issues that can, in some way, be related to Stormwater quality.
- Stuff applicable to state facilities or state funded not as useful.
- Great to have a expert who really understands ADA/accessibility requirements and who was able to explain in a easily understood manner.

**6. Overall Evaluation of the Meeting**

Very Useful: 6

Useful: 8

Not Useful: 0

Comments:

- Excellent panel of experts.

**1. Which Topics were most beneficial?**

- Using structural soils (5)
- Parking ratio/risk to lenders
- ADA

**2. Which Topics were the least beneficial?**

- All were beneficial.
- ADA (2)
- San Jose's approval process for Lowes

**3. Would you be interested in attending additional meetings on understanding potential hurdles?**

Yes: 8

No: 2

**4. Would you be interested in attending a workshop on overcoming the hurdles?**

Yes: 9

No: 1

**5. Suggestion for future topics?**

- More focus on the kinds of development that is typical and currently happening.

**6. General Comments?**

- There were obviously a lot of great questions planned for each topic area that were not really addressed in the first two discussions.
- Do not like meeting at treatment plant. Nauseating odor even inside.
